NVISION
LASER EYE CENTERS | THE EYE DOCTORS' #1 CHOICE

Dan B. Tran, M.D.

Medical Director

Diplomate American Board of Ophthalmology since 1999

A pioneer in ophthalmology, Dr. Tran is a doctor of many firsts. He was the first surgeon in the world to use a commercial IntraLase laser to perform bladeless LASIK procedures, which is now the standard of care for laser vision correction and used by many prominent refractive surgeons. He was the first surgeon in the world to combine the commercial use of IntraLase technology with Intacs (intrastromal corneal rings) to treat patients with keratoconus, a disorder that leads to loss of vision in young adults.

As a clinical investigator participating in FDA clinical trials, a member of the medical advisory board and a consultant for several ophthalmic companies, Dr. Tran has had the opportunity to participate in the development and improvement of several ophthalmic technologies such as phakic intraocular lenses (IOL) for high myopia, IOL in cataract surgery, femtosecond laser in bladeless LASIK as well as cataracts surgeries, corneal inlays to treat presbyopia, and intraoperative wavefront aberrometry in cataract surgery being use today. A board-certified ophthalmologist for more than 10 years, Dr. Tran has performed more than 20,000 LASIK and refractive lens replacement procedures. He is known for having consistent excellent refractive surgical outcomes in laser vision correction, lens replacement surgeries and corneal surgeries. Dr. Tran is the surgeon of choice for several eye doctors, physicians, and other high-level executives in the ophthalmic industry.

Dr. Tran is a medical director for both the NVISION – Fullerton Laser Eye Center and the NVISION – Newport Beach intraocular lens replacement practice. He is also practicing cornea and lens replacement surgeries at his private practice in Orange, affiliated with St. Joseph Hospital; and in Long Beach, affiliated with St. Mary Hospital.

Biography

Education

1984 B.S. in Electrical Engineering, Magna Cum Laude, California State Polytechnic University, Pomona, CA

1985 Graduate Studies in Electrical & Biomedical Engineering, Stanford University, Palo Alto, CA

1987 Graduate Studies in Electrical & Biomedical Engineering, University of Arizona, Tuscon, AZ

1993 M.D., University of Southern California, Keck School of Medicine, Los Angeles, CA

Professional Training

1994 Internship in Internal Medicine, St. Mary Medical Center, UCLA School of Medicine, Los Angeles, CA

1997 Resident in Ophthalmology, Scheie Eye Institute, University of Pennsylvania, Philadelphia, PA

Fellowships

1998 Fellow in Cornea and Refractive Surgery, Shiley Eye Center, University of California, San Diego, CA

Board Certification

1999 American Academy of Ophthalmology

Professional Affiliations

- Member - American Society of Cataract & Refractive Surgery
- Member - American Academy of Ophthalmology
- Founding Member - American College of Ophthalmic Surgery

University & Hospital Positions

- Clinical Instructor, Shiley Eye Center, University of California, San Diego
- Staff Ophthalmologist, St. Joseph Hospital of Orange
- Staff Ophthalmologist, St. Mary Hospital, Long Beach
